Part III DETAILED ACTION

1. Claims 14-15, 17-18, 51-54 are pending.

2 The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 16 stands rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for assisting in the prediction type II diabetes, does not reasonably provide enablement for the prediction of type II diabetes. The specification does not enable any person skilled in the art to which it pertains, or with which it is most clearly connected, to use the invention commensurate in scope with these claims, for reasons set forth in Paper No. 19.

Applicant's arguments set forth in Paper No. 18 have been fully considered but are not found persuasive.

Applicant argues that Gaudet et al., states nothing about what happened to the patients only how they were at the study date.

However, the mean age of the patients was 46.4 years, plenty of time for a genotypic/phenotypic correlation. There is no demonstration of a direct correlation between Applicant's recited genetic mutation and Type 2 diabetes.

4. The following new ground of rejection is necessitated by Applicant's amendment filed 12-3-02.

5. Claims 14-15, 17-18 and 51-54 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant has no support for genus claim drawn to a glycerol kinase gene. As is clearly disclosed by the specification and by Gaudet et al., there is only one glycerol kinase gene, SEQ ID NO. 5. If Applicant was to amend the claim by inserting SEQ ID NO. 5 and the exact nucleic acid residue within SEQ ID NO. 5 that is mutated, the rejection will be overcome.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded

of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for response to this final action is set to expire THREE MONTHS from the date of this action. In the event a first response is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than SIX MONTHS from the date of this final action.
